Application No. 10/073,174

Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner suggested changing the recitation of claim 12 - which reflected adding plant materials at ±0.1% - since it was unclear what was meant by this expression since material cannot be added in a "negative" amount. It was determined by both Examiner and Applicant's representative, Mr. Lee, that an accurate reading of this percentage amount would be 0.9% based on "Example 6", on page 16 of the originally filed instant specification, which indicates that the plant components claimed are mixed at a weight ratio of 596:395:3:33 - compared to tobaccco and Eum-Yang-Kwak leaves - which results in a percentage 0.9%. Applicant agreed to the changes, which is reflected in the attached Exmainer's amendment.
